

TITLE

ARTICLES MADE FROM POLYAMIDE RESIN COMPOSITIONS AND
HAVING IMPROVED FLUID PERMEATION BARRIER PROPERTIES

5

ABSTRACT OF THE DISCLOSURE

The present invention relates to molded articles suitable for the transport or storage of fuels used in internal combustion engines and having improved fluid permeation barrier properties, made from a polyamide resin composition comprising:

10

- (a) 100 weight parts of a polyamide-containing compound,
- (b) 5 to 50 weight parts of phenolic novolac resin, and optionally
- (c) an ethylene/ α -olefin copolymer impact modifier, where the impact modifier is present in up to 40 weight percent, based on the total weight of the composition.
